

Sage X3 add-ons for Food & Beverage

NexTec has developed over two dozen proprietary enhancements designed specifically for the food and beverage industry.

Some of our most requested services are:

ACH Payments	Pay business partners by transmitting payment information directly to the bank, reducing time and risk.
AFS TradePro	Increase forecasting accuracy through discount budgeting & planning, trade reconciliation, managed trade spending, deduction management, and more.
Allocation Module	Lower shipping costs and increase efficiency using product availability and "ship to" data to determine the closest warehouse to ship from.
Automatic Data Collection	Reduce human error and data acquisition costs by leveraging real-time and automatic data collection with bar-code scanning or embedded RFID tags.
CAPA	Reduce inspection preparation time to zero with automated CAPA. Satisfies FDA requirements and provides the operational foundation to manage risk, reduce costs, and grow profits.
Catch Weights	Accurately record and price products based on the actual (rather than standard) weight per case when received into Sage X3, including your customers' Sage X3 systems.
Certificate of Analysis	Compare technical sheets against pre-receiving product samples, speeding the receiving process and ensuring quality standards are met. Prevent receiving of unapproved lots.
Commissions Workbench	Pay commissions on paid invoices only, edit the actual commission amount, select individual invoices for payment, create supplier invoices, and automate generation of comprehensive commission reports.
Consumer Issue Management	Track, monitor and resolve direct-customer and end-customer issues.
Customer Ranking Utility	Extend the marketing and CRM engine to score customers based on RFM (Recency, Frequency and Monetary) order data. Use data to establish CRM campaign targets.
EDM Lite	Simplify attachment printing by defining which attachments will print with Work Order packets and other documents.

Sage X3 add-ons for Food & Beverage

Electronic Data Interchange (EDI)	Improve data integration with suppliers and customers via FTP/AS2, Value Added Network (VAN) and other data transport methods.
Enhanced Certification Expiring Tracking	Track expiration dates for certifications such as sales tax exemptions, USDA certifications, and subcontractor credentials.
AFS TradePro	Accurately record and price products based on the actual (rather than standard) weight per case when received into Sage X3, including your customers' Sage X3 systems.
Grower Accounting	Control construction of sales transactions, selling and then accounting for product sold as a means to pay the grower for the material sold by utilizing pool contracts.
Sticky Notes	Create, organize, and recall "sticky notes" that can be associated with specific business partners or objects.
Point of Sale	Use these solutions to accommodate counter sales, mobile sales or full Point of Sale system integration.
Product Recall Management	Streamline and automate product recall activities including identification, notification, tracking, and reporting with this fully FDA- and SQF-compliant solution.
RFID	Improve production process and lower warehouse management costs by tracking rack products from ingredients to shelf with RFID tagging.
Sage X3 Utilities	Improve management of document transmittals, certification expiry tracking, track multiple currencies, mass invoice reversal, tracked shipment auto-posting, sales commission, accrual reconciliation, and supplier lot record modification.
Scan & Pack Module	Scan products at packing stations to verify shipment accuracy and create package records with UCC 128 labeling and ASN support.
Smart Supplier Lot Modification	Correct mistakes in supplier lot data and have that correction update entries throughout your Sage X3 system.
Starship Integration	Streamline and simplify the entire shipping process, boosting accuracy and efficiency.
